

# PANELES LED

Luminario de LED

Código. 57139

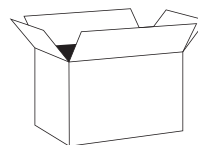

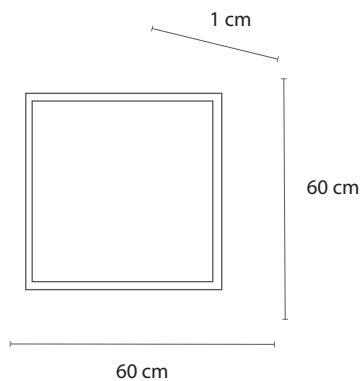

## Especificaciones

|                                                                                                                                                                         |                       |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| Potencia                                                                                                                                                                | 40 Watt               |
| Tensión nominal                                                                                                                                                         | ⚡ 100-277 V           |
| Flujo luminoso                                                                                                                                                          | 3 200 lm              |
| Apertura                                                                                                                                                                | △ 120°                |
| Temperatura                                                                                                                                                             | 6 500 K               |
| Vida útil                                                                                                                                                               | 🕒 25 000 h            |
| Material                                                                                                                                                                | Polycarbonato         |
| Óptica                                                                                                                                                                  | Polycarbonato Opalino |
|   |                       |

**Con sistema  
de sujeción**

## Medidas

### Factor de Empaque

Peso: 17.220 Kg  
Alto: 68 cm  
Largo: 66 cm  
Ancho: 15 cm

Contenido: 8 pzs.

**NOM**

v.001
